

Computer Systems (SI)

The training program is based on

Purpose: high-level skills in architecture, design and management of computer systems

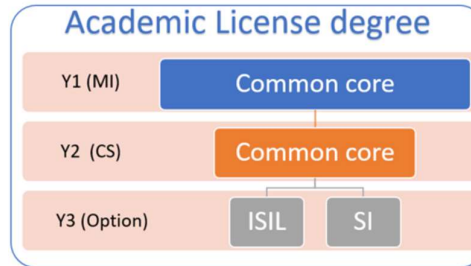

Areas of Activities covered:

1. Systems analysis
2. Development
3. Systems programming
4. Computer application integration

Computer License

The objective of the computer license is to provide three-year programs

- First year (L1): mathematics and computer science common core (Domain).
- Second year (L2): computer science common core.
- Third year (L3): specialization.

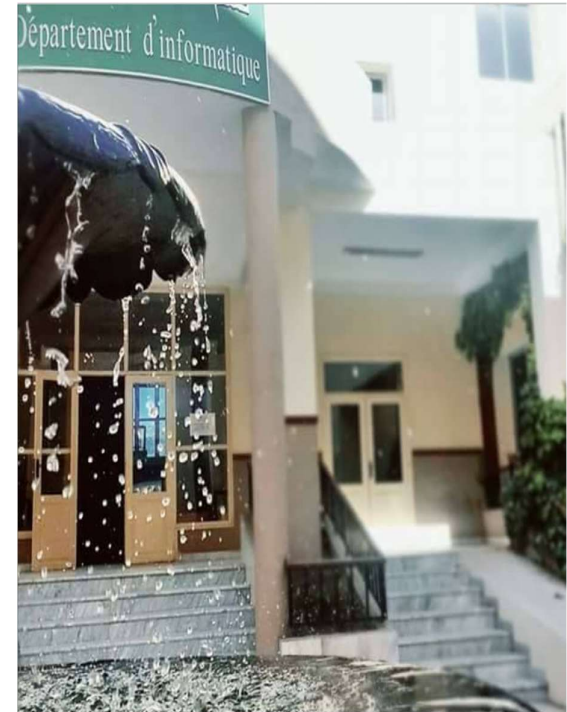

License: 2 programs

- Information Systems Engineering (ISIL)
- Computer Systems (SI)
